アクセル連動昇降バックレスト

アクセルと連動して、シート後部(バックレス ト)が昇降します。

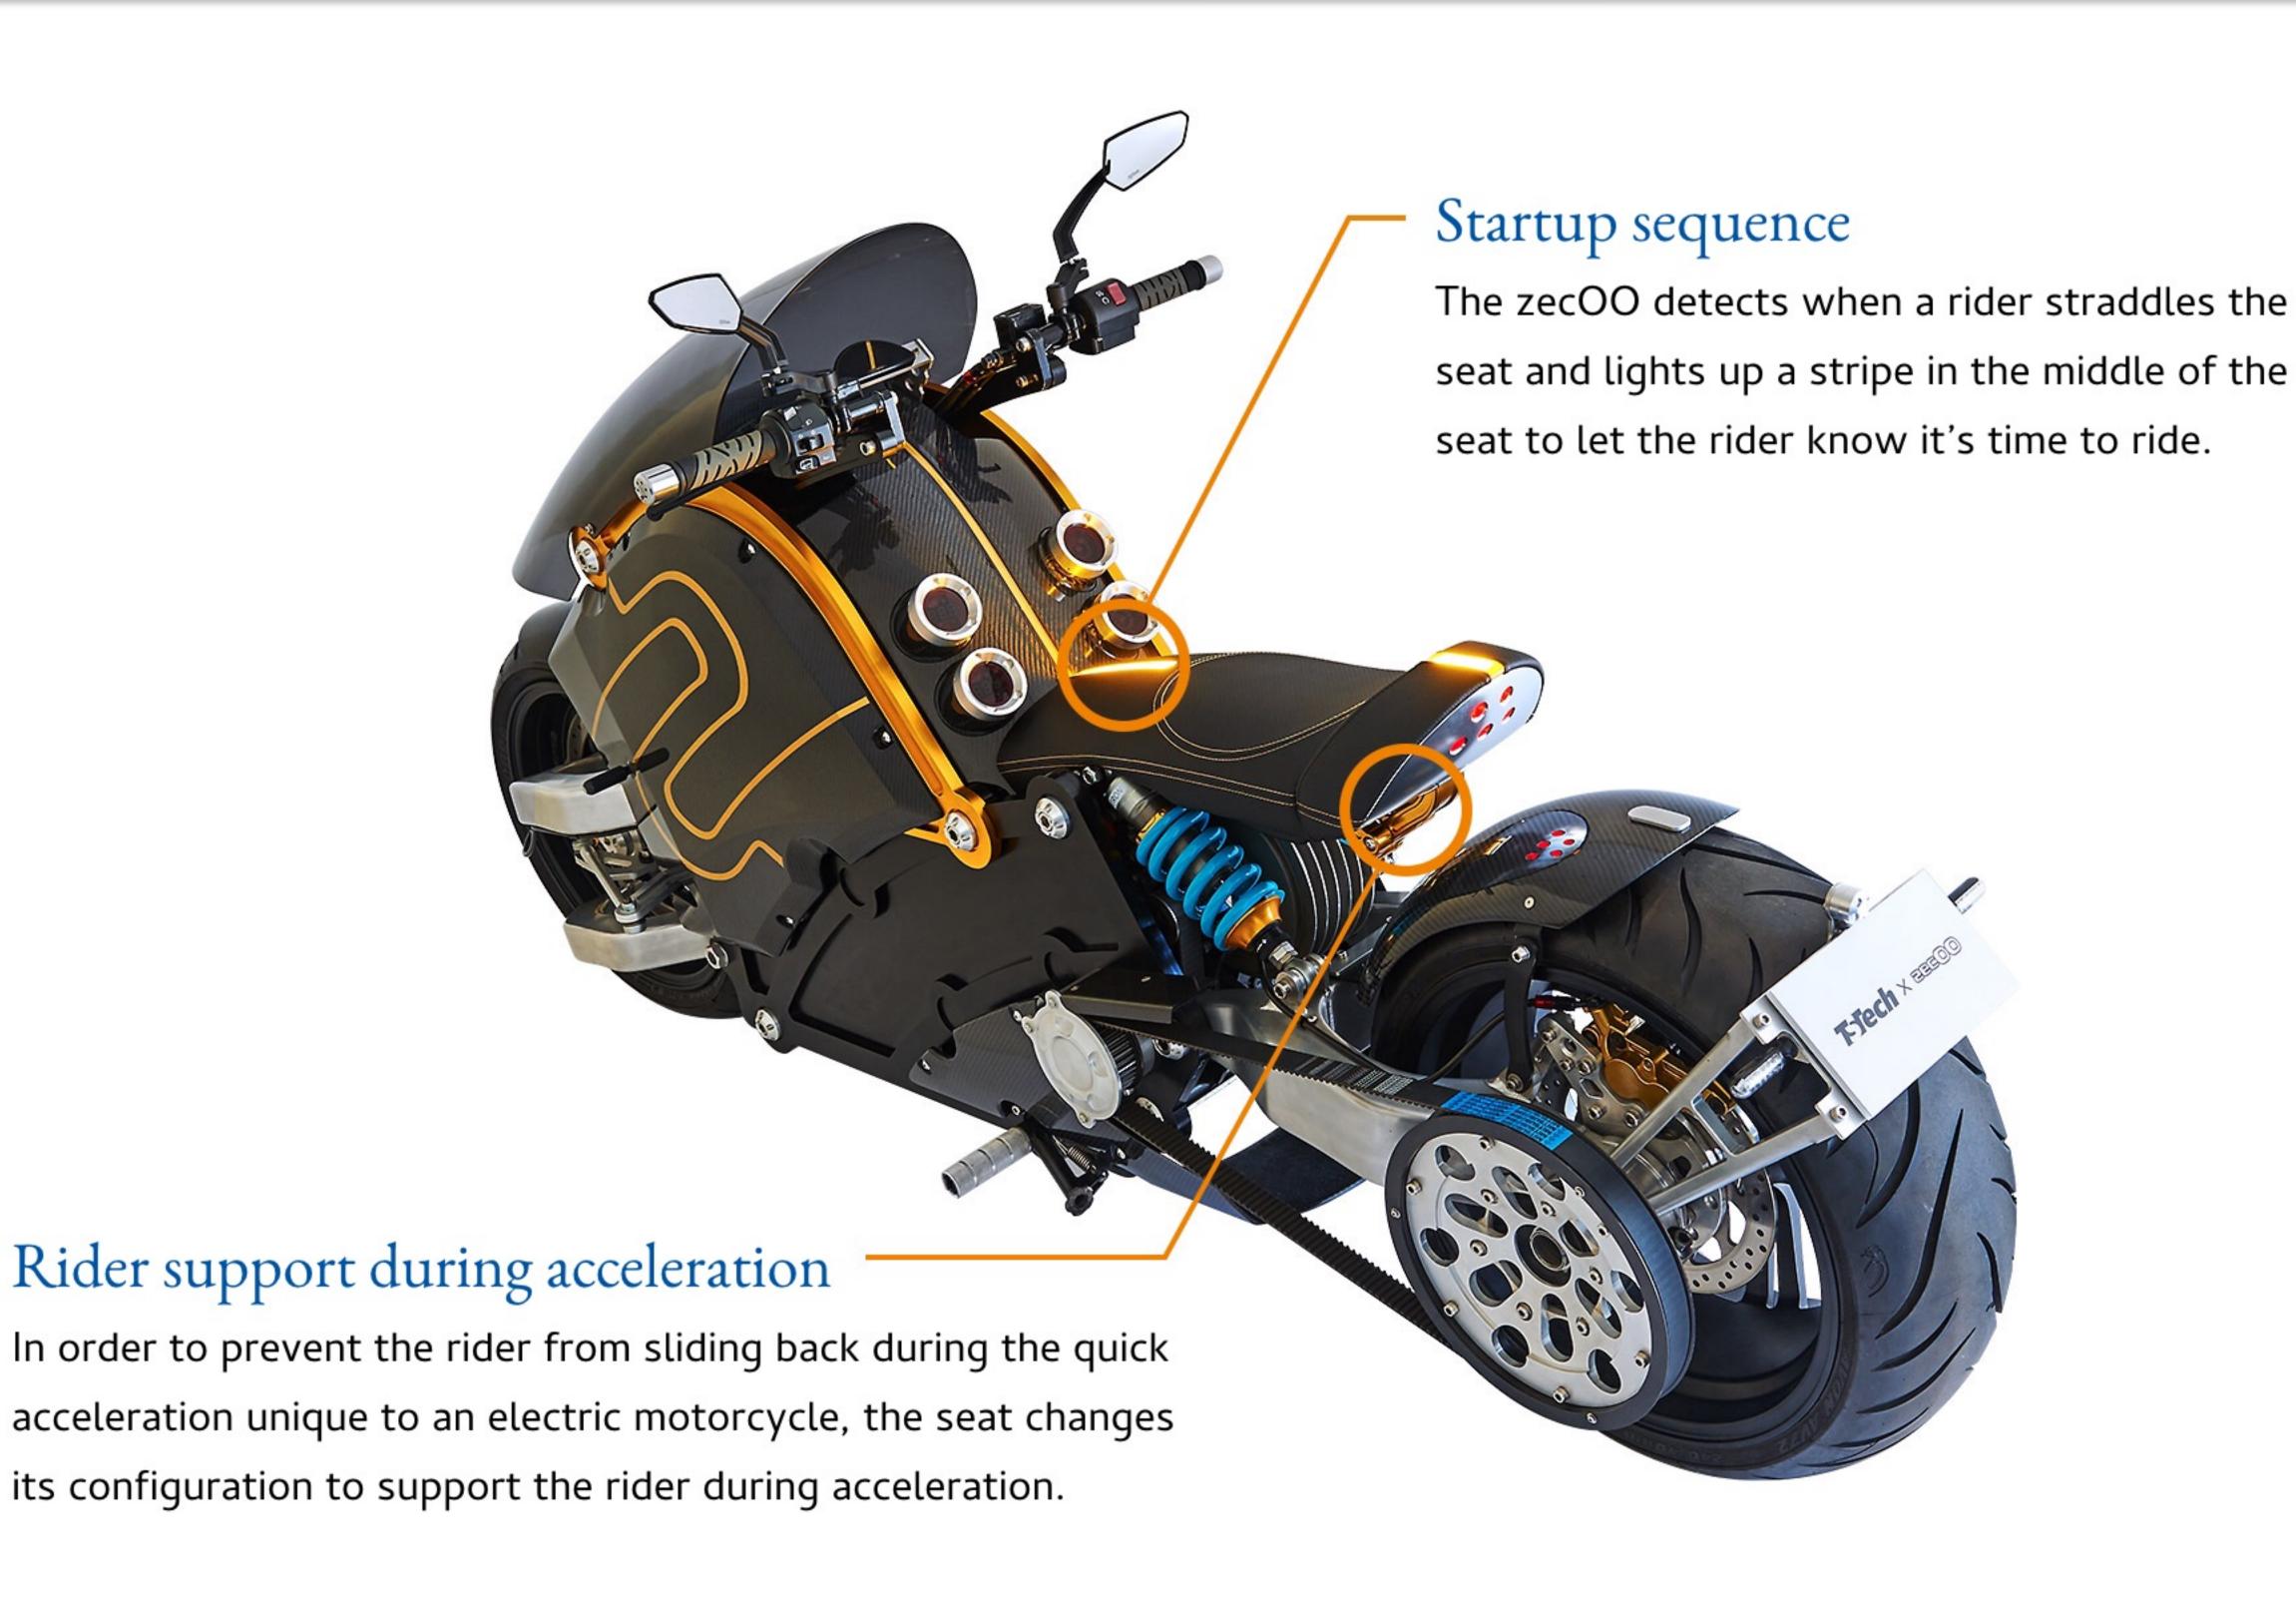

通常時は下降状態、加速時は上昇し後方への 尻ずれをサポートします。

通常時

加速時

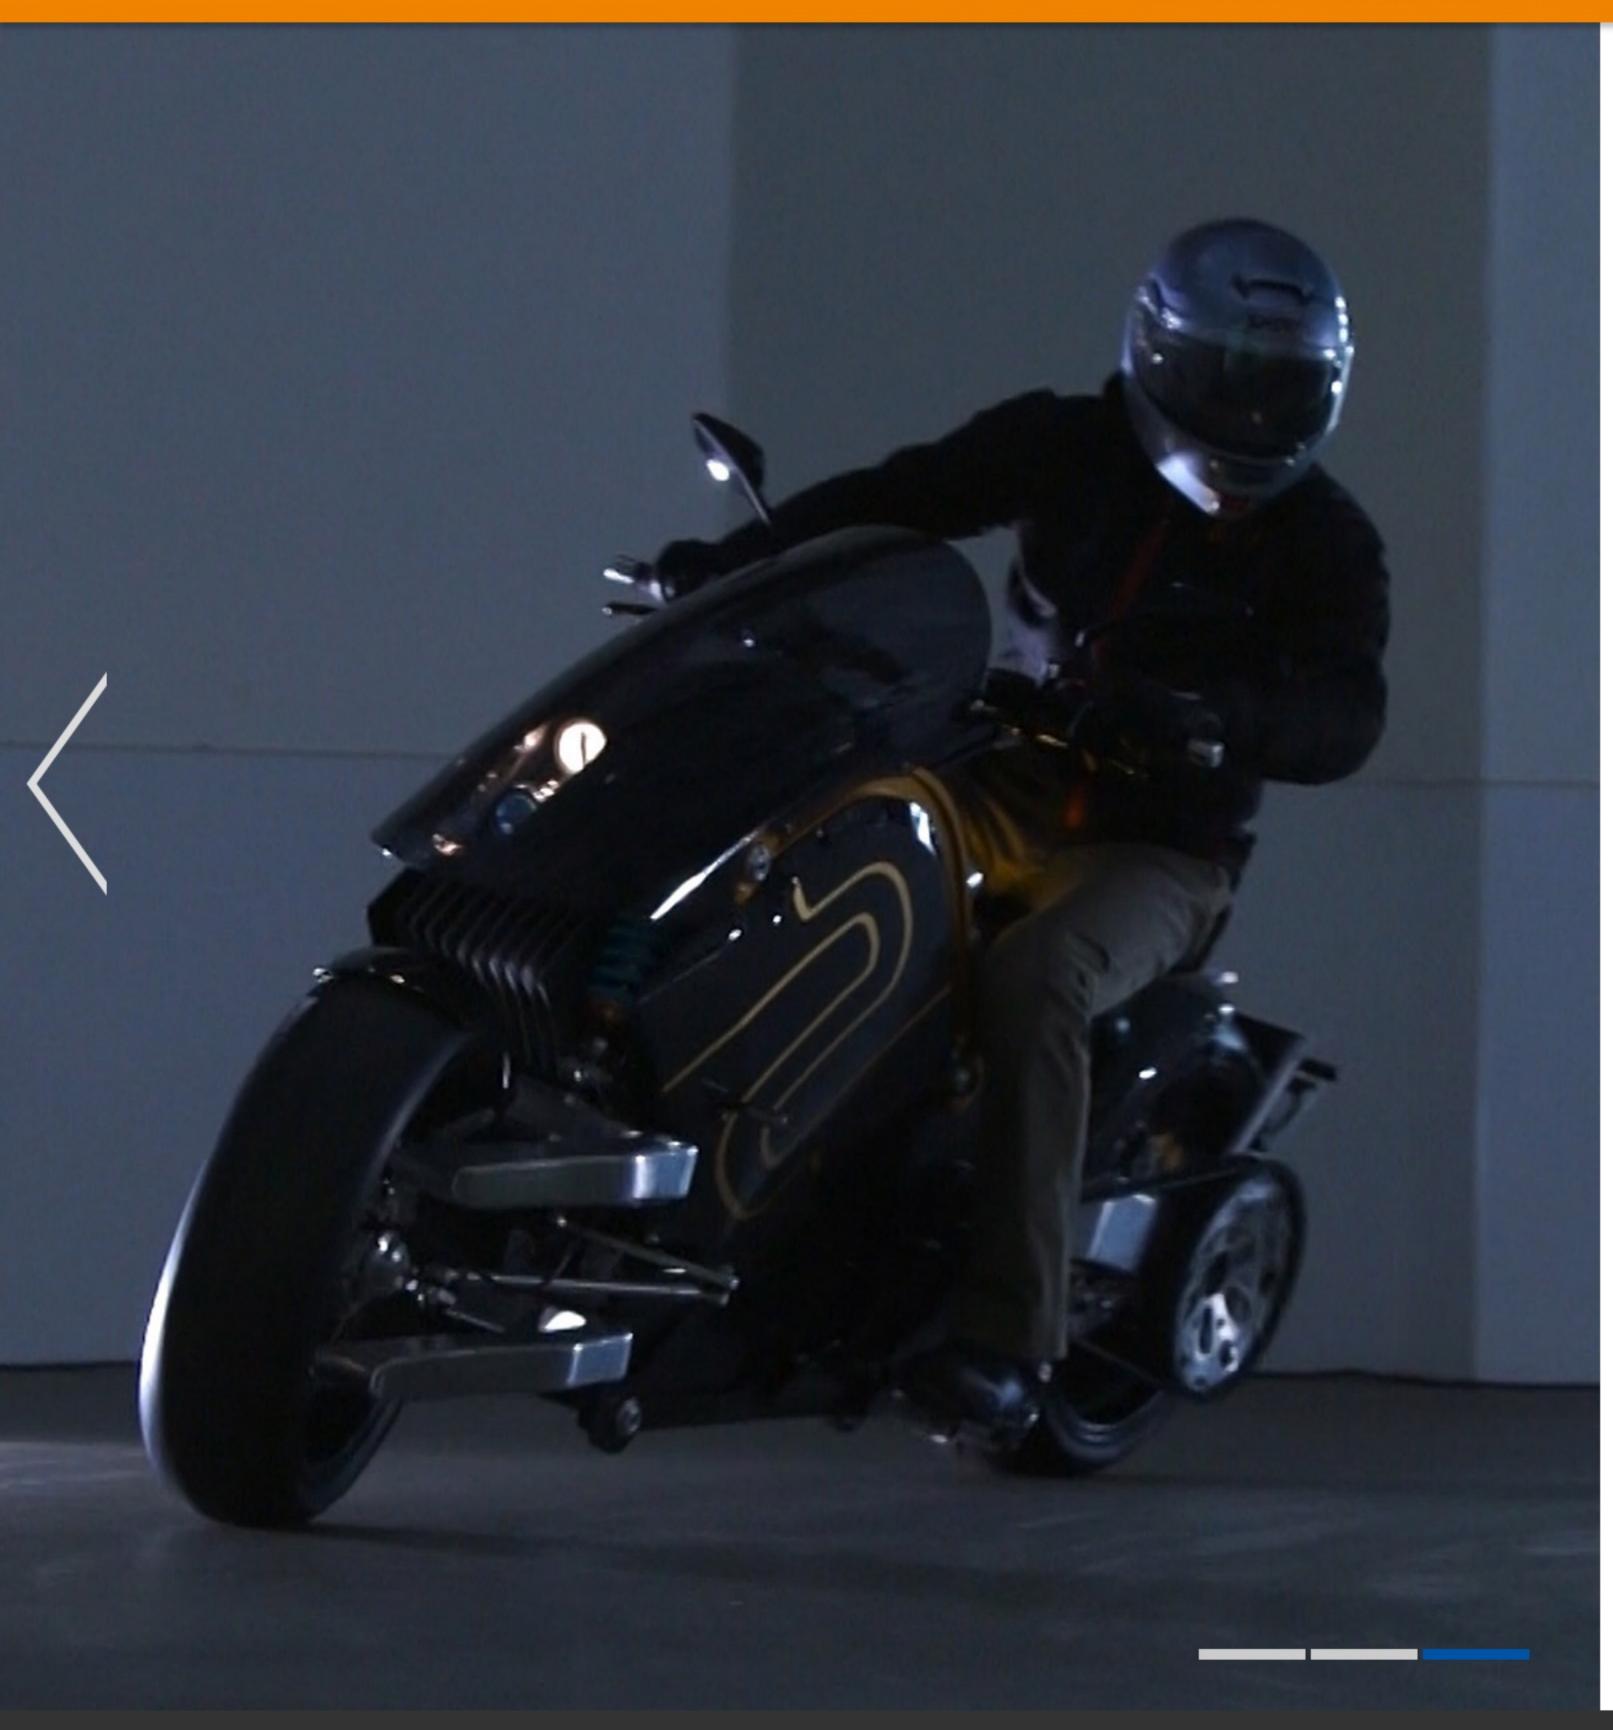

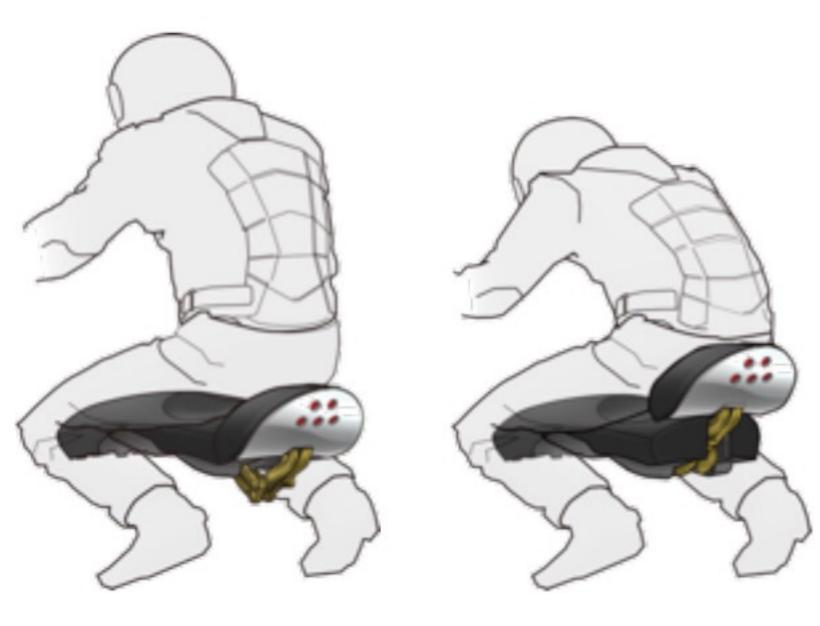

The backrest interlocks with the accelerator and raises up and down

The seat is interlocked with the accelerator, and the backrest raises up and down accordingly.

The backrest is in the down position while a constant speed is maintained, and it raises up during acceleration to support the driver's body and prevent it from sliding back.

Constant speed

During acceleration
